## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-13, drawn to applying molten metal.

Group II, claim(s) 14-18, drawn to oxidation of a metal layer.

Group III, claim(s) 19, drawn to a decorative product.

2. The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: (a) Groups I and III do not have the same special technical features as Group II, because Groups I and III provide for making a decorative effect/decorative effect made using a process where particles of molten metal are applied, which is not required by Group II; and Group II requires a oxidation effect using a saline solution and electrochemical process not required by Groups I and III and therefore Groups I and III lack unity of invention with Group II; and (b) Groups I and III have the special technical feature of a process of applying molten metal with feeding of metal supply, melting metal supply to create small particles at the means for delivering, feeding a gas current contemporaneously at a determined pressure in the means for delivering, with the current entraining the particles of molten metal bringing them on the surface of the object to coat; and that feature is taught by Brown, Jr. et al (US 5879817), see column 4, lines 25-35, column 4, line 65 through column 5, line 5 and column 11, lines 35-45. Due to the above reference indicating that the common special technical feature of Groups I and III is not the applicant's contribution, the two groups lack unity of invention.

3. A telephone call was made to the law office of Benoit Castel on May 18, 2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder. All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process

claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
